

PA HMIS – Data Collection

This quick reference guide outlines the components of the ClientTrack HMIS solution related to data collection efforts.

Workflows

Workflows are designed to operate much like a software 'New Set-up Wizard'. By accessing this menu item, the user performs multiple tasks in a logical sequence without needing to manually navigate through several forms.

Helpful Tip: Once items have been saved to the database, they must be manually deleted (even if the workflow is canceled).

Services

Services within ClientTrack are used to record a client's participation in the projects offered by the organization. Services are also used to record the organizations indirect interactions with members of the community not identified by the agency.

The Client Services screen displays the clients open services

The Add Household Services button facilitates multiple service entry

The Add New Service button facilitates single client service entry

Home Clients Housing

Case Management

- Client Dashboard
- Edit Client Profile
- Household Members
- DV Assessments
- Project Enrollments
- Assessments
- Enrolled Services

Client Services

The client's service history displays below. To record a service for only this client, click the **Add New Service** option. To record a service across all household members, click the **Add Household Services** option. To edit or view an existing service, click the service record.

Please note that these are considered "enrolled" services and can only be associated to a client once they have been enrolled into a project. During the new service process the system will provide a list of projects the client is currently enrolled into to associate with the service.

Quick Services – Multiple Clients

Quick Services for Multiple Clients

This form may be used to quickly record a service to multiple clients. Select a service screen and a specific service, date, and units that you would like to record. Once you have defined a service, you may use the search icon on each row below to find clients to post the service. Alternatively, you can select a program enrollment dropdown list to pre-populate the rows with clients who are enrolled in a particular program as of the date identified in the service date. Simply check the box next to each client to record the service.

A single service can be added to many customers simultaneously through the **Quick Services for Multiple Clients** screen

Service Screen: **HMIS Supportive Services**
 Service: **Outreach**
 Service Date: **09/26/2014**
 Default Units: **1.00**
 Units Of Measure: **Count**
 Unit Value: **1.00**
 Location: **HMIS Service Site**
 Provider: **Kamrin Carver**
 User Performing the Service: **Kamrin Carver**
 Program Enrollment: **HMIS Transitional Housing Program**

The field selections above apply to each displayed customer below

4 records found.
